

HIYQUA®

Drink to healthy living

CHANGE YOUR WATER .. CHANGE YOUR LIFE !

HYQUA is a custom made product. The component of HYQUA is from Japan and is procured from the Japanese scientist who developed. The requirement and capacity is decided only after a detailed discussion with end user. During the discussion the need and capacity required is established. HYQUA is centralized installation hence, the building design and the piping requirements have to be considered.

HYQUA INTERNAL PROCESS HYQUA processes water without disturbing its natural construction and composition. HYQUA does not remove the natural minerals in any stage of purification like other products in the market. Throughout the process the nature's gift is untouched; this is the unique consideration point and HYQUA scores against other similar products in the market, if any. The internal special filter plates are patented. HYQUA is made up of Hydrogen and Micro Bubble Technology.

HYQUA MAINTENANCE The core equipment needs very low maintenance. The associated installation is to be maintained as per the contractor's specification for the particular equipment. The core unit and all the supplies need just a normal up keeping and maintenance periodically and the same will be taken care by our company.

Removes Chemicals and Fertilizers from Fruits and Vegetables

Excellent Hair growth, Reduction in Hair Fall
